On March 23rd, group discussions were held at the Hikone Higashi Science International Forum. In these discussions, students discussed topics on energy issues, natural disasters, living environment issues, water environment issues, world heritage sites and plastics waste issues.

▲The students enthusiastically presented and discussed their research results.

▲The students interacted with each other through calligraphy.

Also, students participated in some special activities such as Icebreaker activity and Buddy Classes.

▶They cooperated and conducted an experiment relating to time.

▼Everyone celebrated the closing ceremony with a smile.

On Day 2, TAP7 students and HHHS students participated in an Icebreaker activity. After, they participated in a Buddy Program where students were separated into Integrated or Calligraphy Class.

In the group discussions, students were divided into six categories and discussed on issues around the world.

Finally, the closing ceremony was held. TSRS which is going to hold the Forum next year delivered a speech and talked with enthusiasm.

SeasonGu Ding (a GIIS student) said, "We had an amazing time today and learned extremely interesting skills such as calligraphy. We are grateful of this opportunity and hope to come back again someday. Thank you!"
